## ABOUT US

Located in Mumbai, India, a technological rubber product manufacturing unit named **Elast - O - Ring An ISO 9001: 2015**,

Was established in the year 2003. The main feature in **Elast - O - Ring** is to manufacture Molded Rubber products, Extruded profiles, Gaskets, and Food Grade products for sealing purpose.

## OUR STRENGTH

Our technical team having more experience of research and Application of rubber compounding and designing of the product to the users Satisfaction. These Compounds are used in manufacturing of various Automotive & Engineering Components including Mechanical seals, pneumatics fitting and valves to prevent leakage. It is suitable for high pressure, high temperature and highly corrosive environment, for all equipments & requirements of today's applications.

- **Maintaining stock of standard O-rings. (FKM/VITON)**
- **Quick supply.**
- **Compound development on request.**
- **Our quality is essential to the success of any business.**
- **We have reached an edge where each and every item hold the tag of excellence and super quality.**
- **We have highly qualified technologist, engineers and high skilled Team work.**
- **We offer innovative skills for development of products.**
- **We are fully equipped with all essential machinery and quality control equipment's.**

Our products perform & live up to their name. In the past few years of successful service to the industry, we have attained total customer confidence by continuously providing top quality products, excellent service & delivery.

We are pleased to let you know that as the requirement of ecologically friendly environment, we have developed the formulations to inhibit or eliminate the formation of Nitrosoamines. These formulations developed by our compound designer are used to manufacture the rubber products which comes in contact with food stuff and drinking water satisfy the FDA status.

US: FDA: 177:2600 Clauses (e) & (f).

To make it more scientific, we have been making considerable annual investment in Research and development work, in the past several year's, we have been benefitted by getting more valuable order from our customer's.

Always in process of better quality, excellent service & ensuring positive growth for mutual benefit.

## PERFLUOROELASTOMER (FFKM)

**ELAST-O-RING** is a leading manufacturer of moulded & extruded rubber Products with wide and increasing range of sealing element. We are manufacturing standard and customized products. Our Products are suitable for high pressure, high temperature and highly corrosive environment, for all equipment's & requirements of today's industrial applications.

With years of experience and knowledge in this domain, **ELAST O RING** Introduces **CHEMITEMP™** offering **FFKM O RING** and provides the next generation of **advanced sealing components** for use in the petrochemical, pharmaceutical, chemical, fertilizer, and biotechnology markets. that are widely appreciated by our clients for their qualitative features.

We deliver highly reliable sealing solutions at low cost and with short leadtimes. Our products are proven to maintain high-integrity seal while withstanding the thermal variances, harsh chemicals etc.

We are Always in process of better quality, excellent service & ensuring positive growth for mutual benefit.

Various applicators have confirmed the excellent chemical & high temperature resistance of our FFKM
